SUMMARY

Full-Stack MERN Developer and AI enthusiast with experience in building scalable, responsive web applications. Passionate about leveraging AI-augmented tools and modern web technologies (React.js, Node.js, MongoDB) to optimize engineering workflows and deliver high-performance solutions.

SKILLS

Languages : JavaScript (ES6+), HTML5, CSS3
Front-end : React.js, Redux, Tailwind CSS
Back-end & Databases : Node.js, Express.js, MongoDB
AI Development : Prompt Engineering, ChatGPT, Claude, GitHub Copilot, Gemini, AI-Aided Development
Tools : Git, GitHub, VS Code, Postman

EXPERIENCE

SNWN Tech Solution Mar. 2026 – Aug. 2026
Web Developer Nashik, India

- Spearheaded rapid front-end development for 150+ responsive websites, executing UI layout adjustments and performance enhancements utilizing AI-supported tools
- Delivered tailored web solutions for international clients (including Finland and the US), managing localized content updates and SEO text replacements
- Streamlined front-end workflows and resolved complex UI bugs, ensuring high-quality and timely deployments across multiple active client platforms

Cognifyz Technologies Feb. 2026 – Mar. 2026
Front-End Development Intern Remote

- Developed and styled reusable UI components (such as navigation bars and cards) using React.js to improve code maintainability
- Integrated basic REST APIs using fetch/axios to dynamically display user data on the front-end interfaces
- Collaborated with the team via GitHub, actively participating in version control and basic bug resolution

Sunanda Infotech Pvt. Ltd. Jun 2024 – Jul 2024
Web Development Intern Nashik, India

- Built mobile-responsive static web pages and landing pages from provided designs using HTML5, CSS3, and Vanilla JavaScript
- Identified and fixed minor UI layout issues and cross-browser compatibility bugs to ensure a smooth user experience

PROJECTS

Jarvis - AI Virtual Assistant (Ongoing) | *GitHub*

- Developing a custom AI-powered virtual assistant utilizing React.js and modern web APIs to process conversational inputs and automate real-time tasks
- Integrating advanced LLM APIs with highly optimized prompt engineering to maintain complex conversation context and ensure accurate, context-aware responses
- Architecting a highly responsive front-end interface with seamless state management to deliver a natural, low-latency conversational user experience

Netflix-GPT AI Movie Recommendation App | *GitHub*

- Engineered AI-driven movie platform processing 1000+ TMDB API records for dynamic content rendering
- Constructed a chat-based AI recommendation engine generating tailored and contextual movie suggestions
- Minimized unnecessary React component re-renders by 30% via optimized state and life cycle control hooks
- Optimized REST API response efficiency by 15% through streamlined asynchronous JavaScript handling

Foodify Food Ordering App | *GitHub*

- Integrated Swiggy public REST API endpoints and configured a proxy server to bypass CORS constraints
- Enhanced perceived application load performance by 25% using custom Shimmer UI placeholders
- Enabled real-time network status monitoring using browser online and offline event listeners
- Structured centralized cart state management using Redux, handling 10+ dynamic e-commerce interactions

GitHub Profile Analyzer | *GitHub*

- Developed React-based GitHub analysis tool leveraging robust external REST API integrations
- Aggregated repository, follower, and account-age metrics dynamically for comprehensive profile comparison
- Processed paginated JSON API responses and computed real-time developer performance scoring

AI-AUGMENTED DEVELOPMENT

- Leveraged advanced Prompt Engineering and AI-driven workflows for rapid UI prototyping, complex API integration, and performance optimization, significantly accelerating development cycles
- Automated routine code generation, debugging, and refactoring using AI assistants, while strictly maintaining production-quality standards and architectural best practices

ACHIEVEMENTS

- **Virtual Internship Program** – Deloitte Australia (2025)
- **Placement Preparation** – IIT Bombay Symposium (2024)
- **ITR Training** – Sunanda Infotech Pvt. Ltd. (2024)

EDUCATION

Sandip University 2025 – 2028
B.Tech in Computer Technology Nashik, India

Maratha Vidya Prasarak Samaj 2022 – 2025
Diploma in Computer Technology (First Class With Distinction) Nashik, India
